

Technical requirements

Stage:

Width: min. 7,5 m ideal 9 m Depth: min. 6 m ideal 7 m

Height above stage: min. 3.5 m ideal 5 m

Curtains with black back wall no curtains are needed

Floor: Black PVC dance floor

Rigging: About 0,5m in front of the back wall we need to hang 5 ropes down to a height of ca 1.5m. Weight load on the single ropes differs from 0,5 kg to 15 kg.

Lights: Dimmer and control board with about 26 channels, 2000W each

Spotlights: ca. 25 PC spots 1000W

2 PC spots 650W

4 PAR 64 1000W cp62

2 Profile spots 15-30° with iris

2 Profile spots 25-50°

3 stands 2,0m

4 floor stands

audience light that can be dimmed

Sound: - Sound mixer with stereo line entrance (mini-jack stereo)

- Amplifiers and PA system adapted to the auditorium

- 2 monitor speakers on stage

Special: - During the show the actor spills about 1kg of wheat semolina.

For cleaning after the show we need brooms and a vacuum cleaner

Dressing rooms: The company needs a dressing room with hot and cold water, shower and toilette.

Setup: Normally starts the day of the show, at about 10 a.m. The stage will remain busy with setup, focusing lights and rehearsal until the entrance of the audience.

Staff: At least 1 technician (setup, lights and sound) for about 6 hours.

Notice: If you cannot fulfill these technical requirements in all details, or if you see other problems, please contact us as early as possible and send us a stage plan and a list of the technical material. We will try to find a solution.
